Call-off from this framework agreement is by means of i) direct award ii) combination ranked and further-competition and iii) further-competition Members will determine the correct lot to use when placing a call-off contract from the framework agreement by assessing their requirement against the available lots.

Members can choose how many suppliers they wish to award to as long as this is made clear at the start of the process.

i. Direct award without re-opening competition.

If the framework agreement sets out all the terms governing the provision of the works, services and/or supplies concerned and all the objective conditions that are required to make a decision for award of the specific contract, then awarding the contract without re-opening competition amongst the parties to the framework agreement is possible. In this instance, the choice of provider(s) must be based on the objective criteria laid out in the procurement documentation

ii. Mixture of direct award and mini-competition.

Should all relevant questions have been asked at tender stage and Institutions require price only, they should:

Utilise the scores achieved by suppliers at award stage of the tender process.

Discard the 'Price' scores achieved at award stage.

Carry out a benchmarking exercise of institution shopping basket.

Members are required to contract with the highest scoring Supplier(s).

The procurement documents for the framework agreement must set out objective criteria which will be used to determine whether a specific contract will be placed following a reopening of competition or directly on the terms set out in the framework agreement, so it is clear and transparent for all users and suppliers. The procurement documents should also specify which terms may be subject to the re-opening of competition. For example, a direct award could be for those suppliers allocated to provide goods to a specific region and the accompanying objective criteria for selecting to re-open competition could be:

1. the contract exceeds a set financial threshold
2. the quantity of products required is over a certain level
3. the contract has particularly complex requirements

iii. Mini-competitions.

When the framework agreement does not include all the terms governing the provision of the works, services and supplies concerned, the contracting authority must organise a 'mini-competition' between the providers which are party to the framework agreement.
